

# **Profitec's billing and back-office services can help successfully launch your new reseller business**

**Our mission control experts have done it more than 200 times**

A successful lift-off is a complex task, requiring a myriad of people and system resources to work together in a symphony of effort. Having the smallest thing go wrong can end in catastrophic failure.

At Profitec, we realize there are many critical path items that need attention to ensure success. Through the experience we have gained helping our clients get started we have developed a customized implementation team approach, designed to identify and address all facets of service initiation.

We make it easy to get started. We can provide solutions ranging from web-order entry to billing to Internet bill presentment, and our customer service operation can support everything from order entry to hard collections and virtually everything in between. To ensure quality control we develop all of our software internally while making use of the latest hardware and software technology, including in-house printing and mailing equipment.

**Our goal is to help you minimize your risk and maximize your business potential.**
